

Management of Skeletal Metastases

Patient Data

Physician:

Patient's name (Initials):

Age:

Sex:

Histological diagnosis:

Anatomical location:

(please mark side, location, and exact anatomical extent of the lesion)

Solitary metastasis: Yes No

Visceral metastases: Yes, Site: No

Presentation:

Matrix:

Pathological fracture

Blastic

Impending fracture

Lytic

Painful lesion

Mixed

Associated pain:

Mild

Moderate

Functional (Aggravated by function)

Extent of bone diameter involvement:

<1/3

1/3 - 2/3

>2/3

Prior treatment:

Chemotherapy: Yes, No

Bisphosphonates: Yes, No

Radiation: Yes, No

Previous surgery: Yes, No

Other:

Surgery: Yes, No

1. Intramedullary rodding - open, closed, with PMMA, without PMMA

2. Plating - with PMMA, without PMMA

3. Resection with prosthetic reconstruction

4. Minimally invasive percutaneous surgical procedure.

Type: _____

5. Amputation

6. Other: _____

Post-operative radiation: Yes, No

Comments: _____
